The current Development Strategy for the Mazowieckie Voivodeship until 2020 was adopted on May 29, 2006 by Resolution of the Voivodeship Assembly No. 78/06. The document constitutes a coherent and comprehensive concept of the region's development in the long-term perspective. However, despite the proper course of the strategic programming cycle, 5 years have passed since its adoption, during which the formal and legal conditions for conducting development policy in Poland and the socio-economic situation of the region have changed.
