This article presents a demographic forecast, abbreviated for publication purposes, which was prepared in the spring of 2016 for the Office of the Municipality of Konstancin-Jeziorna, in connection with the entry into force of the amendment to the Law on Spatial Planning and Development [2003, amended in 2016]. The amendment consisted of the introduction of provisions requiring municipalities to draw up land balances in local plans, taking into account the actual demand for housing.
