Ladies and Gentlemen, in the issue you hold in your hands, we publish the results of research devoted to the broad topic of regionalism, starting with its definition and ending with a discussion of issues related to a specific region, such as the Mazowieckie Voivodeship. These extremely interesting studies consist of articles prepared both by academics from the University of Warsaw, the Warsaw School of Economics, the Fryderyk Skarbek University of International Trade and Finance in Warsaw, as well as materials developed on the basis of research conducted as part of the project "Development Trends of Mazovia," financed by the European Social Fund under the Human Capital Operational Program subdivision 8.1.4.
