The article concerns the landscape of the tourist triangle of Kazimierz Dolny-Nałęczów-Puławy which became the basis for the a plan of regional development and cooperation. The purpose of the research presented in the article was to indicate the landscape's economic and social values based on selected documents, important from the point of view of landscape management, and to compare them with the subregion's strategic planning documents.

[Magdalena Opania - Landscape values as a basis for subregional developmentPobierz](#)
