The article includes part of the research results from the second chapter of the module report "Physical Capital". The module report was carried out within the framework of the project "Infrastructure development and physical capital and polycentricity of Mazovia's development" (Development trends of Mazovia). In one of the chapters of the module, entitled. "Physical capital - productive assets," there was a broad description of Mazovia's enterprises based outside of Warsaw. This article characterizes fixed assets in Mazovia's enterprises, investments and sales revenues in the broader context of the development of the above-mentioned variables in the province as a whole.
