

The balance of benefits and disadvantages. A private owner faced
with the decision to include the building in the register of
monuments | 1

The paper is an attempt to answer the question of whether every property is worth and should be included in the register of monuments, posed from the point of view of the owner of a property “with a past”. I discuss the problem using the example of a manor house in Huta Minska, showing the difficulties faced by its owners and the changes they make to this property, related to necessary repairs and necessary modernization.
